

Exercise Ten

10.1 Create a package called `seer_package` in `c:\course\ex10_1.sql`.

Include the following processes already created within it (use cut and paste) ...

procedure `insert_stock` created in `c:\course\ex9_3.sql` (`ex9_2.sql` will also be acceptable)

function `get_section` created in `c:\course\ex8_4.sql`

function `calc_vat` created in `c:\course\ex8_2.sql`

Compile both header and body. Test using the following ...

```
select seer_package.calc_vat(100, 20) from sys.dual;
```

```
SEER_PACKAGE.CALC_VAT(100,20)
```

```
-----  
120
```
