

Using the Java Editor – Hints while typing

Note that the closer you get to a completed class call the more comprehensive the information on the right hand side.

Using the Java Editor – Bracket Location

Java code is very dependant on brackets, braces and parentheses being matched, that is, an opened brace must have a closing brace, the editor in Eclipse will match the brace when clicked on

...

```
public static void main(String[] arguments)
{
    System.out.println("Hello");
}
```

```
public static void main(String[] arguments)
{
    System.out.println("Hello");
}
```
