

The alias can be a single word and in lowercase (but *oci\_fetch* will need to refer to it in uppercase) ...

```
select product_id product  
    ,product_name product_name // Can also be two words or more
```

If the Developer wishes to use lowercase or spaces, the alias can be enclosed by double quotes ...

```
select product_id "product"  
    ,product_name "product name"
```
