

## Object Details Dialog – Columns Tab (Icons)

Above the Column's data are several icons ...

The first icon allows the User to 'freeze' the pane, allowing another dialog to be displayed for another table, if this isn't selected the dialog is overwritten by every subsequently selected Table.

The second icon is the Edit Table option and will be examined in more detail later in the course.

The refresh icon is the third option, followed by the Actions option which will be examined later in the course.
