

Exercise Seven

7.1 Create a virtual column for the Stock Information table which takes the `si_unit_price` and multiplies it by the `si_no_in_stock` to give a total value column.

<i>SI_STOCK_NUMBER</i>	<i>SI_UNIT_PRICE</i>	<i>SI_NO_IN_STOCK</i>	<i>SI_TOTAL_VALUE</i>
1	12.99	100	1299
2	10.99	25	274.75
3	15.99	10	159.9
4	1.99	1500	2985
5	3.99	50	199.5
6	3.99	75	299.25
7	4.99	100	499
8	29.99	20	599.8
9	9.99	15	149.85
10	15.99	10	159.9
11	3.99	50	199.5

Exercise Seven

7.2 Continuing with the Stock_Information table, create a column called 'si_net' which is the si_unit_price and multiplied by the si_no_in_stock minus the 20% vat

...

<i>SI_STOCK_NUMBER</i>	<i>SI_UNIT_PRICE</i>	<i>SI_NO_IN_STOCK</i>	<i>SI_TOTAL_VALUE</i>	<i>SI_NET</i>
1	12.99	100	1299	1082.5
2	10.99	25	274.75	228.96
3	15.99	10	159.9	133.25
4	1.99	1500	2985	2487.5
5	3.99	50	199.5	166.25
6	3.99	75	299.25	249.38
7	4.99	100	499	415.83
8	29.99	20	599.8	499.83
9	9.99	15	149.85	124.88
10	15.99	10	159.9	133.25
11	3.99	50	199.5	166.25
