

## Exercise Nine

9.3 Using the procedure modified in ex9\_2, change the two tests on the data into sub-processes. Make both processes functions called from the main block which will return boolean values according to whether the data passes the test or not. Save as ex9\_3. Test as follows ...

```
begin  
  insert_stock(151, 5, 'Auto', 7, 54);  
  insert_stock(151, 5, 'Willow Tree', 0.87, 54);  
end;
```
