

# Exercise Ten

---

10.1 Log into Discoverer User Edition and create a workbook using items from the Products Group Folder in the Products Group business area. Notice that you cannot drill from Group Number.

10.2 Using the Products Group business area, create a hierarchy between Group Number in the Products Group folder, Product Number and Name in the Products folder (group these 2 items) and Sales Number in the Products Sales folder.

10.3 Log into Discoverer User Edition and create the above workbook again. Try drilling from Group Number this time and you should be able to drill down based on the hierarchy created in EX10\_2.

10.4 Export the business area and save it as EX10\_4.eex

# Exercise Ten

---

10.5 Using the Products Group business area, create a date hierarchy of your choice to be used by Transaction Date in the Products Sales folder. Create a new format of 'MM' for the month folder.

10.6 Log into Discoverer User Edition and check that your date hierarchy is used instead of the default date hierarchy.

10.7 Export the business area and save it as EX10\_7.eex

10.8 Create a Drill to Detail between the Products Group folder and the Products folder in the Products Group business area.
