

Exercise Eleven

11.3 Copy ex11_2 to ex11_3, using a FocusListener, test that a Stock name exists, display an appropriate message and place the focus for the form back into the name field ...

11.4 Copy ex11_3 to ex11_4, create two new components, a JLabel and a JFormattedTextField, make the field unenabled and populate it by multiplying the Price by the number in stock, use the FocusListener already created in ex11_3. To prevent an error occurring make sure both fields have values before multiplying them together.
