

Exercise Four

4.1 Using the array created in ex3_4.php, sort the values in key order and produce the following output ... Save as c:\course\ex4_1.php

The city of Birmingham is 1,010,400

The city of Bristol is 465,500

The city of Edinburgh is 452,200

The city of Glasgow is 637,000

The city of Leeds is 477,600

The city of Liverpool is 464,200

The city of London is 7,619,800

The city of Manchester is 465,900

The city of Sheffield is 458,100

Exercise Four

4.2 Amend ex4_1.php to total the population figures supplied. Save as c:\course\ex4_2.php

Total population = 12,050,700

4.3 The next few exercises are based on a file called c:\course\ex4_0.php, several arrays are already created within it.

Using c:\course\ex4_0.php, intersect the alphabetic and vowel array and display the result using var_dump(). Save as c:\course\ex4_3.php ...

```
array(5) { [0]=> string(1) "A" [4]=> string(1) "E" [8]=> string(1) "I"
           [14]=> string(1) "O" [20]=> string(1) "U" }
```
