

Exercise Nine

9.1 Share_Index is a table which contains the Footsie 100 share index results for five years, create a query which produces a 'lag' output for the 2002 year, restrict the records selected to only those for Fridays (in other words index values for the end of the week). An additional column should display the difference between the two figures. Output should look like this Save as c:\course\extwo9_1.sql

	Date	Todays Index	Last Weeks Index	Difference
1	04-JAN-2002	5323.7563	(null)	(null)
2	11-JAN-2002	5198.5690	5323.7563	-125.1873
3	18-JAN-2002	5126.7926	5198.5690	-71.7764
4	25-JAN-2002	5193.0456	5126.7926	66.2530
5	01-FEB-2002	5189.6829	5193.0456	-3.3627
6	08-FEB-2002	5128.0905	5189.6829	-61.5924
7	15-FEB-2002	5182.4812	5128.0905	54.3907
8	22-FEB-2002	5050.8366	5182.4812	-131.6446
9	01-MAR-2002	5169.0150	5050.8366	118.1784
10	08-MAR-2002	5285.6511	5169.0150	116.6361
