

## Exercise Four

4.5 Using the Club\_65 table, display the c65\_title, c65\_member\_name and c65\_member\_surname together in one column using the concatenation symbols ||, save the sql as c:\course\ex4\_5.sql ...

The screenshot shows a SQL Developer window titled "Query Result" with a status bar indicating "SQL | Fetched 50 rows in 0 seconds". The main area displays a table with a single column named "Name" containing 13 rows of names. A "Row Count" dialog box is overlaid on the table, showing "145 Rows" and an "OK" button.

| Name                  |
|-----------------------|
