

# Essential SQL for Oracle 21c Computing Limited

Section	Title	Page
One	<b>Learning Oracle SQL</b>	<b>2</b>
	- What is Structured Query Language	3
	- What is an Oracle Database?	4
Two	<b>Oracle Database Objects</b>	<b>5</b>
	- What Oracle Database Objects are used by a User	6
	- What's the purpose of Tables in an Oracle Database	7
	- The purpose of Views in an Oracle Database	8
	- The purpose of Materialized Views in an Oracle Database	9
	- Why use Indexes in an Oracle Database	10
	- The purpose of Sequences in an Oracle Database	11
	- What are Oracle Packages, Functions and Procedures	12
	- The use of Synonyms and Schemas in Oracle	13
	Three	<b>The Oracle SQL Plus Interface</b>
- How to logon to SQLPlus		15
- What do I need to login into SQLPlus		16
- The initial details shown in SQL Plus		20
- ORA-01017 Error when logging into SQLPlus		21
- ORA-12154 Error when logging into SQLPlus		22
- How do I exit an SQLPlus session		23
- Using Dos commands in SQLPlus		24
- SQLPlus Function Keys		25
- Using the Line Editor in SQL Plus		26
- Using the Editor in SQL Plus		27
- SQL Plus Environment Settings		28
- Saving and Reading in SQLPlus		29
- Spooling Results to a file in SQL Plus		30
- Changing Passwords / Clearing the Screen in SQL		31
Four	<b>SQL Scripts</b>	<b>32</b>
	- What are Oracle SQL Scripts	33
	- An example of an Oracle SQL Script	34
	- Commenting SQL Scripts	36
	- What are Oracle SQL Scripts	33
	- How to run SQL in a Batch Script	38
	- Passing Parameters to SQL Scripts	40
Five	<b>Simple Queries</b>	<b>42</b>
	- The syntax of an Oracle SQL Query	43
	- What's the purpose of Oracle Metadata	44
	- Most useful Oracle Metadata views for Users	45
	- How to use an Oracle Metadata View	46
	- What's the purpose of Oracle Metadata	44
	- A simple SQL select statement	49
	- Counting Records in an Oracle Table	52
	- Displaying Literals in a Select statement	54
	- Displaying Variables in a Select statement	57
	- <i>Exercise One</i>	58
	- What are the different styles of SQL Column Aliases	62
- Column Manipulation with SQL Functions	65	

# Essential SQL for Oracle 21c Computing Limited

Section	Title	Page
	- How to concatenate or join Columns in SQL	71
	- Performing Calculations in SQL	72
	- Using Order By to sequence data in SQL	73
	- Ordering More than One Column	75
	- Ordering a column with nulls in some records	76
	- Outputting Dates in SQL	77
	- <i>Exercise Two</i>	79
<b>Six</b>	<b>Using Where Clauses in SQL</b>	<b>84</b>
	- Limiting Data in SQL	85
	- Structure of an SQL Where Clause	86
	- Comparison Operators in SQL Where Clauses	87
	- Dealing with Nulls in Where Clauses	95
	- Case Restrictions in SQL Where Clauses	96
	- Using Functions in Where Clauses	97
	- The use of Rownum in SQL Tables	100
	- The use of Rowid in SQL Tables	102
	- Using Fetch in SQL to limit records returned	104
	- Using Percent with Fetch in SQL to limit records returned	105
	- Using Offset with Fetch in SQL to limit records returned	106
	- Using With Ties and Fetch in SQL to limit records returned	107
	- <i>Exercise Three</i>	108
<b>Seven</b>	<b>Oracle Datatypes</b>	<b>113</b>
	- What are the Oracle Datatypes	114
	- What is a Varchar2 datatype	115
	- ORA-00910 when specifying length for varchar2	117
	- The difference between Varchar2 and Char	118
	- Using Number datatypes in Oracle SQL	119
	- Date datatypes in an Oracle database	120
	- What are Floats in SQL	121
	- What were Long datatypes in Oracle	122
	- Breakdown of LOBs in Oracle	123
	- How do Bfiles work in Oracle	127
<b>Eight</b>	<b>Aggregating Values</b>	<b>128</b>
	- Totaling columns in SQL	129
	- Using Group By to sub-total values	130
	- Using the Having clause with Group By	133
	- Creating a Grand Total using Rollup	135
<b>Nine</b>	<b>Tree Walking Tables in SQL</b>	<b>136</b>
	- What is Tree Walking	137
	- Syntax for Tree Walking in SQL	139
	- Example of Tree Walking in SQL	140
	- Advanced Ordering of Siblings in Tree Walks	141
	- Using Sys_Connect_By_Path in Tree Walking	143
	- <i>Exercise Four</i>	145
<b>Ten</b>	<b>Joining Tables and Views in an SQL Select Statement</b>	<b>148</b>
	- Defining Table Aliases in SQL	149
	- Joining Tables in an SQL statement	151
	- Outer Joins in SQL	156

# Essential SQL for Oracle 21c Computing Limited

Section	Title	Page
	- Methods of Joining Tables in SQL	158
	- Using Ansi SQL 1986 to Join Tables	159
	- Using Ansi SQL 1986 with Outer Joins to Join Tables	160
	- Natural Joins with Ansi SQL 2016 (ANSI X3.135)	163
	- Cross Joins with Ansi SQL 2016 (ANSI X3.135)	164
	- Join/Using with Ansi SQL 2016 (ANSI X3.135)	165
	- Join/On with Ansi SQL 2016 (ANSI X3.135)	166
	- Left Outer Join with Ansi SQL 2016 (ANSI X3.135)	168
	- Right Outer Join with Ansi SQL 2016 (ANSI X3.135)	169
	- Full Outer Join with Ansi SQL 2016 (ANSI X3.135)	170
	- Creating Table Sets in SQL	171
	- Using the Merge / Set Syntax in SQL	172
	- Creating Table Sets in SQL	171
	- Using Union to Merge Tables in SQL	174
	- Using Union All to Merge Tables in SQL	175
	- Using Intersect to Merge Tables in SQL	176
	- Using Intersect All to Merge Tables in SQL	177
	- Using Minus to Merge Tables in SQL	178
	- Using Minus All to Merge Tables in SQL	179
	- Using Except to Merge Tables in SQL	180
	- Using Except All to Merge Tables in SQL	181
	- <i>Exercise Five</i>	182
<b>Eleven</b>	<b>Advanced SQL Query Techniques</b>	<b>186</b>
	- Improving the output of the SQL Query	187
	- Pivoting output in SQL	188
	- Pivoting output in SQL with a Total	193
	- Changing the Pivot Headings of X Axis	194
	- Rotating the Axis of the Pivot	196
	- Using Unpivot to normalise a table's records	197
	- Using Unpivot to normalise a table's records with nulls	200
	- Output the first (or last record) value in each row	201
	- Output the first (or last record) value in each row with nulls	203
	- Breakdown of SQL Window Specification	204
	- Window Specification - The Arguments	207
	- Window Specification - Query Partition	208
	- Window Specification - The Order By	210
	- Window Specification - The Windowing	212
	- Window Specification - Rows between	214
	- Window Specification – Shortcuts	218
	- Difference between Range and Rows	219
	- Reading records ahead of the current using Lead and Lag	222
	- Ranking Records in order of importance / value	226
	- Using Ntile to group records in set of data	233
	- Width_Bucket – Another way to group records	235
	- Group values together using Listagg Function	238
	- Syntax of Case in Oracle SQL	240
	- <i>Exercise Six</i>	244

# Essential SQL for Oracle 21c Computing Limited

Section	Title	Page
<b>Twelve</b>	<b>Creating Oracle Database Objects</b>	<b>248</b>
	- Creating Tables in SQL	249
	- What are Mandatory Columns in SQL Tables	251
	- Creation Syntax for Tables in SQL	252
	- Creating Tables by copying an existing table	253
	- Virtual Columns in Oracle	254
	- Creating Virtual Columns with new Table	255
	- Specifying Virtual Column Datatype and Size	256
	- Altering an existing table to add a Virtual Column	257
	- Selecting Virtual Columns in SQL ...	258
	- Using functions within Virtual Columns	260
	- Limitations of Virtual Columns (ORA-54012)	261
	- Limitations of Virtual Columns (ORA-54015)	262
	- Limitations of Virtual Columns (ORA-54013)	263
	- Viewing Virtual Columns in USER_TAB_COLS	264
	- Invisible Columns in Oracle 21c	265
	- Creating Comments on Tables	268
	- Commenting on Columns in SQL	272
	- Types of Indexes in Oracle Tables	270
	- Creating Indexes in SQL	272
	- Examples of Index Syntax in SQL	273
	- Disabling Indexes in SQL	275
	- Creating Views in SQL	276
	- Creating Sequences in SQL	278
	- Using Sequences in SQL	279
	- Altering Sequences in SQL	281
	- Using Default Value in SQL Tables	282
	- Using Default Value in Oracle 21c	283
	- Using Identity in Oracle 21c	284
	- Renaming Objects in an Oracle Database	285
	- Dropping Objects from an Oracle Database	288
	- Granting Access to other Schemas	289
	- Accessing other Schemas	292
	- Creating Synonyms in Oracle	293
	- <i>Exercise Seven</i>	294
<b>Thirteen</b>	<b>Altering and Populating Oracle Tables</b>	<b>296</b>
	- Rules When Altering Oracle Tables	297
	- Syntax for Altering Oracle Tables	298
	- Rules When Populating Tables in SQL	299
	- Syntax for Populating Oracle Tables	300
	- Using Variables To Populate Tables	305
	- General Comments	306
	- Updating Data in Oracle Tables	307
	- Deleting Data from Oracle Tables	309
	- Handling Large Objects in SQL Plus	310
	- Handling BFiles in SQL Plus	312

# Essential SQL for Oracle 21c

Section	Title	Page
<b>Fourteen</b>	<b>Committing Records</b>	<b>313</b>
	- The Difference Between DDL & DML	314
	- Using Autocommit in SQL Plus	317
<b>Fifteen</b>	<b>Materialized Views</b>	<b>318</b>
	- What are Materialized Views	319
	- Syntax for Creating Materialized Views	321
	- Refreshing Materialized Views	323
	- Building Materialized Views	329
	- Miscellaneous	331
	- <i>Exercise Eight</i>	332
<b>Appendices</b>	<b>Appendix S1 – SQL Functions</b>	
	<b>Appendix S2 – SQL Line Editor Commands</b>	
	<b>Appendix S3 – SQL Environment Settings</b>	
	<b>Appendix S4 – SQL Number Formats</b>	
	<b>Appendix S5 – SQL Date Formats</b>	
<b>Delegate Questionnaire</b>
